

CHECKLIST FOR MARKETO ENGAGE

Get marketo setup faster by expertly managing your migration. Spend the precious moments before go-live letting the robots test your instance, so you don't have fire drills. Build a world class center of demand excellence by getting started for free. Stack Moxie puts the tools built for Microsoft and IBM in the hands of any marketing team.

Your Report Results		Your Marketo Details	
10 / 10		Munchkin ID: 879-epw-974	IP Address: 194.195.216.9
Market Munchkin ID	SPF Record	DKIM Record	
Domain Blacklist Status	IP Address	CNAME Marketo Landing Pages	
CNAME Marketo Email Tracking	Market API Usage Today 7% On average you use 15%	Salesforce Lead Mapping	
Market to SFDC Sync 00:00:00:19 Days:Hours:Min:Sec			

Benefits of the Checklist for Marketo Engage

- Quickly establish a baseline of your implementation
- Share logs of errors with your team to resolve issues fast
- Pinpoint errors that support is unable to recreate
- Determine API usage and related limits
- Check SFDC Sync and Lead Mapping

In a snap, get critical details about your instance:

- Munchkin ID
- SPF Record
- DKIM Record
- Blacklisted Domains
- IP Address
- CNAMEs for Landing Pages
- CNAMEs for Email Tracking
- Daily & Weekly API Usage
- SFDC Lead Mapping
- Sync time from Marketo to SFDC

Stack Moxie is a Marketo Engage launchpoint certified partner on the [Adobe Experience Exchange](#).

Your security is our top concern. [Stack Moxie's Security portal](#) has detailed information about pentesting, application security, and datacenter protections. Stack Moxie never needs to use PII (personally identifiable information). The checklist can add immense value without ever being integrated into your systems (Salesforce or Marketo).

Setup is easy:

1. Create a free account to get started
2. Run the checklist without any integrations
3. Connect the Marketo integration to learn about API limits
4. Connect the Salesforce integration to gain Sync times and Field Mapping validation
